MILL CREEK SYSTEMS, INC. ANNOUNCES THE RELEASE ITS LOW COST RASTER/HYBRID EDITING SOFTWARE, RAS/EDIT, FOR MICROSTATION V8

(Baltimore, MD, May 18, 2003) – Mill Creek Systems, Inc. today announced the release of its low cost RAS/Edit raster hybrid editing software for MicroStation V8 at the Bentley International Users Conference. RAS/Edit provides a complete, low cost hybrid editing solution for MicroStation.

“In addition to releasing RAS/Edit for MicroStation V8, we added several new features including interactive delete, copy, move (similar to a selection set) a scrub brush eraser to make using it even easier and more productive to use,” says Warren A. Newhauser, President of Mill Creek Systems, Inc. “RAS/Edit is also available for MicroStation V7 (/J) and SE with an identical user interface which will help make the transition to V8 easier for larger organizations.”

The low RAS/Edit annual maintenance costs can provide a direct savings up to 70% or more per year over legacy raster editing programs. “Over a two or three year period, the cumulative savings of using RAS/Edit for a large organization with 100 users could approach or exceed six figures. This is especially relevant in these economic times where organizations are eagerly looking to cut IT costs and do more with less,” says Newhauser.

RAS/Edit also is 100% binary compatible with existing I/RAS B hybrid drawings (DGN and TIF/CIT) allowing organizations with a significant investment in this technology to utilize a lower cost solution such as RAS/Edit.

For more information on RAS/Edit or for a free 30 day evaluation, please contact Mill Creek Systems, Inc. toll free 1-866-MILLCREEK, via email at info@millcreeksystems.com or visit us on the web at www.millcreeksystems.com.

Since 1992, Mill Creek Systems, Inc. has been dedicated to providing strategic results to its customers through CAD/GIS shrink-wrap as well as custom-solution software products. The company developed the popular RedAlert Automatic MicroStation File Corruption Detection Software (free download at www.millcreeksystems.com), and the functional I&C Schematic Wizard, which allows users to create schematics for substations.
