**MILL CREEK SYSTEMS, INC. ANNOUNCES THAT S/D ENGINEERS, INC.
CHOOSES RAS/EDIT RASTER/HYBRID EDITING SOFTWARE FOR
MICROSTATION**

(Arlington Heights, IL, March 7, 2003) Mill Creek Systems, Inc. announced that S/D Engineers, Inc. chose RAS/Edit raster hybrid editing software for MicroStation SE Edition over I/RAS B and DESCARTES. RAS/Edit provides a complete, low cost hybrid editing solution for MicroStation.

S/D Engineers, Inc. is one of the top 25 Engineers in Western Pennsylvania according to the Pittsburgh Business Times. S/D Engineers provides high quality services to industry, process equipment suppliers, and contractors.

S/D Engineers, Inc. was looking for a low cost fully functional raster-editing package for MicroStation that would enable them to edit hybrid drawings created with I/RAS B by their customers. In addition the raster editing software had to work in a legacy MicroStation SE environment and not incur additional maintenance contracts.

"With RAS/Edit, we now have a cost effective solution that allows us to edit hybrid/raster drawings exactly as we need to on the MicroStation platform," says Anthony P. Centore, PE, Manager, Electrical and Control Systems, S/D Engineers, Inc., Pittsburgh, PA.

S/D Engineers had to edit hybrids created over many years by different CAD systems, which required an intense and dedicated support. "I also appreciate the way your staff helped us resolve issues as they arose. I don't know of anyone that supports their software as well as your team does," adds Anthony.

For more information on RAS/Edit or for a free 30-day evaluation, please contact Mill Creek Systems, Inc. toll free 1-866-MILLCREEK, via email at info@millcreeksystems.com or visit them on the web at <http://www.millcreeksystems.com>.

Since 1992, Mill Creek Systems, Inc. has been dedicated to providing strategic results to its customers through CAD/GIS shrink-wrap as well as custom-solution software products. The company developed the popular RAS/Edit hybrid editing software and TimeTracker utility that tracks time spent in CAD drawings.
